Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections – 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-2 and 4-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Miloslavsky et al (US 6,625,139).
2. In regards to claims 1, 10, 11, 13, and 15, Miloslavsky discloses a method, system, and computer program product of processing customer contact requests, comprising steps of: receiving information from a particular customer service representative "CSR" (agent) indicating where the particular CSR is currently located (col. 23-24 lines 56-13 and col. 30 lines 51-63); receiving one or more incoming customer contact requests for which CSR interaction is indicated (col. 12 lines 47-53); and routing selected ones of the received customer contract requests to the particular CSR using the received location information (col. 13 lines 34-53, col. 16 lines 9-27, and col. 16-17 lines 66-8).
3. In regards to claims 2, 6,, and 7 Miloslavsky discloses the method, wherein the location information from the CSR is received over a network connection (Internet 1106)

between a processing device (client computer 1114) used by the CSR and a remotely-located server (server 1132) (col. 3 lines 22-29, col. 11 lines 34-40, and lines 55-59).

4. In regards to claim 4, Miloslavsky discloses the method, wherein the CSR interacts with a Web page to transmit the received location information and to handle the routed customer contact requests (col. 13 lines 14-33 and col. 19 lines 42-48).

5. In regards to claims 5, 9, 12, 14, and 16, Miloslavsky discloses the method, system, and computer program product further comprising the steps of: receiving revised location information from the particular CSR, wherein the revised location information indicates a different location where the particular CSR is now located; and subsequently routing selected ones of the received customer contact requests to the particular CSR using the received revised location information (col. 23-24 lines 56-13, col. 27 lines 18-34 and lines 50-60).

6. In regards to claims 8 and 9, Miloslavsky discloses the method, wherein the received location information indicates a geographic location of the CSR (Fig. 12 and col. 21 lines 15-18).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Miloslavsky et al (US 6,625,139).

8. Miloslavsky discloses all of claim 3 limitation, except the method, wherein the processing device used by the CSR is a thin-client device. Miloslavsky, however, does disclose the processing device used by the CSR as being a computer (client computer 1114). Therefore, it would have been obvious for one of ordinary skill in the art at the time of the invention to use a thin-client device (i.e. handheld computer or palm device) as a way of allowing the CSR to report location information.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Girerd et al (US 6,131,067) teach a client-server based remote locator device. Girerd et al (US 6,661,372) teach a client-server based remote locator device.
